Geeta University
B.Tech, Computer Science Engineering (CSE)
| 7.66 CGPA
2022 - 2026

Projects

Dragon Game

- The goal is to create a simple game where one traveller can go to different location and fight.
- I built this mostly using javascript
- In this game there is one traveller who can go to town, cave, dragon cave, where he can fight and buy different powerups and weapons.

Skills Developed: HTML, CSS, Javascript

Prime.tv

- The goal is to learn how to work with API's and set data accordingly to the backend
- I taken the API of TMDB and based on that created the UI where user can see latest movies and tv shows.
- Movie streaming platform, user can watch trailer and latest and trending movies .

Skills Developed: React.js, API, Tailwind, Javascript

WearWise

- Developed a smartwatch-based health monitoring system to analyze body stats and provide real-time health insights.
- Integrated sensor data with an AI-driven questionnaire to assess user health and offer tailored suggestions.
- Smart alerts for health risks, interactive MCQs for diagnosis, and personalized recommendations.

Skills Developed: NextJs, Typescript, Tailwind
